Important update:

Packaging compliance (PPWR) – how we support you through upcoming changes

Dear customer,

We would like to inform you about upcoming regulatory changes in the European Union related to packaging and how Mondi is supporting you during this transition.

The new Packaging and Packaging Waste Regulation (PPWR) will introduce several requirements affecting packaging and related communication. The first requirements are expected to apply from **12 August 2026**, with further developments to follow in the coming years.

What this means and how we support you

At Mondi, we have established a dedicated cross-functional project team to ensure that our products and processes meet these new requirements in a timely and reliable way.

Our goal is to **make this transition as smooth as possible for you** and to provide clarity where changes may affect your products and packaging.

Our role and your role

Responsibilities under PPWR depend on whose brand appears on the packaging and which type of packaging is concerned:

- **Customer Own Brands**

For packaging that carries your brand, such as ream wrappers and boxes, you are classified as the manufacturer and are responsible for ensuring compliance with the applicable PPWR requirements for this packaging.

Mondi's role for Customer Own Brands

For Customer Own Brand packaging, Mondi acts as your supplier and supports you by providing relevant technical information on our packaging materials, for example regarding substances such as PFAS or heavy metals.

- **Mondi mill brands**

For packaging carrying Mondi mill brands, Mondi is reviewing and preparing the

relevant packaging information to address applicable PPWR requirements, including manufacturer details and packaging identification where required.

- **Transport packaging**

Mondi remains responsible for transport packaging (eg reel wrappers, pallets, edge protection, stretch foil) used to deliver products and will ensure compliance for this packaging type.

What may change for you

The new regulation introduces additional information and identification requirements.

This may require you to **update packaging designs or product communication** for Customer Own Brands.

We see PPWR as a shared challenge for our joint supply chain and are committed to working collaboratively with you to support this transition, helping to make the necessary changes for your packaging as practical and efficient as possible.

What you can expect from Mondi

- Transparent sharing of relevant technical data
- Ensuring compliance for Mondi mill brands packaging: preparation of the relevant packaging information, including manufacturer details and packaging identification on required packaging elements
- Support from your Mondi sales contact for any specific questions

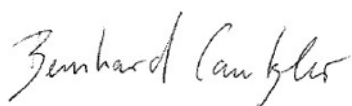

Important note

Please note that this information reflects Mondi's current understanding of the regulatory framework and is intended to support you with general guidance.

Regulatory interpretation may evolve, and we recommend assessing the implications for your specific products and packaging, where appropriate, with qualified experts.

If you have any questions, please contact your Mondi Sales Representative.

Kind regards,
